Overview

Software Engineer with hands-on experience in designing scalable backend applications, RESTful APIs, cloud-based systems, and AI-enabled software solutions. Experienced in Python, Java, Spring Boot, Django, AWS, SQL, and full-stack development with a strong foundation in Data Structures, Algorithms, Object-Oriented Programming, and Computer Networks. Passionate about building secure, distributed software systems integrating Generative AI, cloud technologies, and intelligent automation.

Education

- **University Visvesvaraya College of Engineering (UVCE)** *2025 - Present*
  M.Tech in Computer Science and Engineering
- **Government Engineering College, Hassan** *2021 - 2025*
  B.E. in Computer Science and Engineering, CGPA: 8.80/10

Experience

- **Parvam Software Solutions** *Feb 2025 – Oct 2025*
  Software Engineering Intern Onsite
  - Developed backend applications using Java, Spring Boot and Python following REST architecture.
  - Designed and integrated REST APIs with SQL databases for scalable enterprise applications.
  - Implemented authentication, authorization and secure API access using Spring Security.
  - Built image-processing and OCR modules using Python and OpenCV for document automation workflows.
  - Collaborated using Git, Agile methodology, debugging, testing and code reviews to deliver production-ready software.

Projects

- **AI Powered Rail Complaint Intelligence** *2025*
  Python, TensorFlow, OpenCV, NLP, Django, HuggingFace
  - Developed an AI-assisted complaint management platform using Django and Python.
  - Designed REST APIs for complaint submission, OCR processing and multilingual classification.
  - Integrated HuggingFace NLP models for complaint categorization and sentiment analysis.
  - Built an end-to-end processing pipeline supporting OCR, preprocessing and automated prioritization.
- **AWS IoT Environmental Analytics** *2026*
  AWS IoT Core, Lambda, DynamoDB, MQTT, Python
  - Designed a serverless IoT data pipeline using AWS IoT Core, Lambda and DynamoDB.
  - Implemented MQTT-based real-time sensor communication for environmental monitoring.
  - Built Lambda functions to process telemetry data and store structured records in DynamoDB.
  - Developed analytics dashboards for monitoring sensor trends and system performance.
- **WealthManager Portfolio Analytics** *2025*
  React, Django REST, Chart.js, PostgreSQL
  - Developed a full-stack portfolio analytics platform using Django REST Framework and React.
  - Designed REST APIs for portfolio management, asset allocation and performance analytics.
  - Built reusable React components with Chart.js for interactive financial visualizations.
  - Optimized backend APIs and database queries to improve application responsiveness.

Technical Skills

- **Programming Languages:** Python, Java, C++, SQL, JavaScript
- **Frameworks:** Spring Boot, Django, React, REST APIs
- **Cloud Technologies:** AWS IoT Core, Lambda, DynamoDB, EC2, GCP
- **Databases:** MySQL, PostgreSQL, SQLite, DynamoDB
- **Developer Tools:** Git, GitHub, Postman, VS Code, Linux
- **Core Computer Science:** Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- **AI Technologies:** TensorFlow, OpenCV, NLP, HuggingFace, OCR, Generative AI (Basics)
- **Concepts:** Software Design, REST Architecture, Microservices, SDLC, Agile

Achievements

- Finalist – IISF Hackathon 2024.
- Finalist – TechForSociety Hackathon 2025.
- Solved 250+ coding problems.
- Built multiple AI, IoT and full-stack projects available on GitHub.

Certifications

AWS Cloud Practitioner Essentials
Python Programming
SQL for Data Management
Git and GitHub
REST API Development
